Professional Summary

I am a web developer who enjoys building clean, responsive, and user-friendly web apps. I work mainly with Laravel and WordPress, turning ideas and designs into real, working apps that people can actually use. I also use no-code tools and automation to save time and improve how things work. I am always learning new tech to keep up with changes and make sure that the apps I build are fast, reliable, and easy to scale.

Skills

- **Web Development** – WordPress, Laravel, HTML, CSS, JavaScript, Bootstrap
- **Programming Languages** – PHP, Python, Java, C
- **Database** – MySQL, PostgreSQL, Firebase, MongoDB
- **Automation Tools** – n8n, Make, Zapier
- **SEO Tools** – RankMath, on-page optimization, Ahrefs
- **Cloud & Hosting** – AWS (EC2, S3), Firebase Hosting, cPanel, Azure
- **Other Tools** – Figma, Git, GitHub, LaTeX, Unity, Microsoft Office
- **AI/Big Data** – Pandas, NumPy, PyTorch, TensorFlow, Hadoop, PySpark

Experience

Codavatar Tech Pvt. Ltd.

Apr 2025 – Present

WordPress Developer

- Developed fully responsive WordPress websites from Figma designs.
- Created custom themes, built custom plugins, and managed dynamic content with ACF.
- Implemented SEO enhancements including schema, speed optimizations, and semantic markup.

Mangosoft Pvt. Ltd.

Intern – 2023

Web Developer Intern (Laravel + WordPress)

- Built and deployed WordPress sites; resolved Laravel bugs and back-end issues.
- Integrated third-party APIs and developed back-end features for client needs.

Projects

- **KrispCall** – krispcall.com
Managed and enhanced the company's WordPress site: created interactive pages, customized themes, and developed plugins to improve user experience and engagement.
- **Tivazo** – tivazo.com
Developed a website for a time-tracking software company. Improved the layout, made it mobile-friendly and worked on faster load speed.
- **TechSphere** – techsphere.wpenginepowered.com
Built a responsive WordPress website for a tech blog agency with custom plugins and API integrations for dynamic content and user engagement.
- **ContentAfter** – contentafter.com
Developed a clean, responsive website for a marketing agency from scratch.
- **CaptchaMarketing** – captchamarketing.com.au
Delivered a complete business website for an Australian marketing agency. Customize the theme, develop plugins, and use dynamic content to make it more interactive.
- **Modern College Website** – modern.edu.np
Built a complete educational website for a college in Nepal.

- **Waste Management System** – Laravel Final Year Project Created a system to help manage the waste collection problem in the Kathmandu Valley. Designed for use by both NGOs and government offices to schedule and track garbage disposal efficiently.
- **School Management System** – Laravel Project
Developed a full system for school use. Handles student registration, teacher records, classes, attendance, and more. Already in use at two schools locally.
